About Nevis

This 36-square-mile Caribbean island lies near the top of the Lesser Antilles archipelago, about 200 miles south of Puerto Rico and just west of Antigua. This island jewel is approximately seven miles long and five miles wide, with natural vegetation that is unparalleled. Nevis is one of the remaining unspoiled places on earth. From the top of the 3,232-foot Nevis Peak created by the only shield volcano in the Caribbean to the depths of the clear waters offshore, there is a world of flora and fauna to explore.
